General Information

Short summary

A Lithuanian metal processing company, established in 2005, specializing in the production of technological equipment, transportation systems, rolling conveyors, and various metal constructions, is looking for reliable and long-term partners. The company offers the design and production of custom products tailored to customer specifications under manufacturing or supply agreements.

Full description

This Lithuanian company has over 18 years of experience in metal processing and is equipped with a qualified and highly skilled staff, an experienced management team, and advanced technological capabilities to design and produce sophisticated metal equipment. The company is certified under ISO 9001 quality assurance standards, ensuring consistent and superior production quality.

The company's primary focus is to deliver high-quality products at competitive prices while adhering strictly to customer specifications and deadlines.

The product portfolio includes a variety of equipment and constructions such as:

Gravitational roller conveyors
Powered conveyors

Belt conveyors
Lifting tables
Turning tables
Store systems
Various containers

The company also has significant experience working with customers from Lithuania, Latvia, Finland, Norway, the Netherlands, and other EU countries.

Advantages and innovations

High-quality manufacturing process with ISO-certified standards.

Competitive and reasonable pricing.

On-time production delivery.

Capability to handle small quantities or single-unit production runs.

Flexibility to adjust dimensions and specifications during the manufacturing process.

Proven track record of successful collaborations with EU-based partners.

Technical specification or expertise sought
