General Information

Short summary

The company is located in Ukraine and has two offices in Lviv and Kyiv. The company is actively working on architectural visualizations. The makers are looking for partners abroad who may be interested in the company's services: architectural, construction, design companies, for a subcontracting agreement or outsourcing agreement.

Full description

The company has been working in the market of Ukraine for more than 11 years. The producer works with interior and exterior visualizations, 3D modeling, 3D floor plans, 3D animation, 3D orbital models. 3D modeling is an opportunity to show the product in a real space. The best way to present a brand new thing, as well as to show all the details and elements of the model as realistically as possible. 3D exterior visualization is a great way to present own property to potential investors and clients. Customers receive high-quality 3D images of future or current projects. 3D interior visualization is a service that allows to create a three-dimensional picture of the interior. Interior visualization helps to organically plan and see the future concept of the room.

3D floor plans are a service that helps to create an accurate layout of an apartment or house, taking into account the location of furniture and all the details of the decor. 3D orbital model is an interactive 3D model of a building that includes interior and exterior visualizations, 3D floor plans, and interactive interaction with the building. The company is ready to cooperate with companies that provide similar services abroad (3D services, VR, AR) and requires assistance in project implementation from outsourcing. The manufacturer is ready to work with builders, real estate agents, design studios and visualization studios as contractors who develop large construction projects and are interested in subcontracting some of their work or all construction projects under contracts or subcontracts in part of architectural visualization.

Advantages and innovations

The company employees are professionals with architectural education. The company has permanent customers abroad. The manufacturer often works with customers from the United States, Central and Northern Europe. The company is ready to perform a project of any complexity. The manufacturer has a portfolio with dozens of successfully implemented projects. The producer has the practice of working with the signing of a confidentiality agreement. The company is ready to work with customers from different countries. Why choose this company:

- have experience with projects from all over the world;
- know how to work quickly and efficiently;
- know and skillfully use all modern trends in the field of 3D;
- more than 10 years of experience.

The company maintains competitive conditions and provides for clients with excellent service in producing high-quality visual material. The manufacturer actively and efficiently performs interior and exterior projects and the company is ready to create a 3D video project with the design of object.
