General Information

Short summary

The company produces plastic parts for various purposes in standard and customised forms and aims to export them to the EU, United Kingdom, and the Balkan region.

Full description

Duk Trade was established in 2020 and specializes in producing plastic parts for various industrial purposes (mainly for the construction industry), along with providing plastic molding services. Key products include:

- tile leveling systems for ceramic tiles of all sizes,
- wedges for tile leveling systems,

- rebar spacers,
- insulators for electric fences,
- plastic cable ties,
- custom-made products.

The company is already exporting its products and is gradually expanding its production capacity while increasing its product range. Competitive pricing, combined with a focus on quality and reliability, ensures customer satisfaction.

The company is seeking a partner:

- to open a branch in Austria,
- for the production of products (also tailored to customer specifications),
- for product placement in the United Kingdom and across Europe, believing that their products are highly competitive.

Advantages and innovations

The products are competitive in the market, and the company has already exported them abroad.

Technical specification or expertise sought

The company is looking for distributors for its products and industry partners interested in the product range and customized products.

Stage of development

Already on the market

Sustainable Development goals
