General Information

Short summary

A Polish SME from the Greater Poland region, operating in the wood processing sector, specializes in the production of sawn timber and wooden construction elements. With over 26 years of experience, the company ensures the highest quality of raw material sourced from State Forests and guarantees on-time deliveries. The company is looking for distributors, sales agents, and long-term partners in the construction and woodworking industries under commercial and supply agreements.

Full description

The company, located in central Poland, has been active in the sawmilling industry since 1999. It has extensive experience in wood processing and a strong market position as a reliable supplier of sawn timber and construction wood for the construction and industrial sectors. The SME uses high-quality raw material from State Forests and applies modern processing methods, ensuring precision and durability of its products.

The product range includes:

- sawn timber,
- construction wood,
- roof trusses and beams,
- pallet boards,
- other wooden construction elements,

- wood residues for fuel, etc.

The company has built its reputation on timely deliveries, flexibility towards customer needs, and solid business practices. Its products are widely used in construction, carpentry, and by industrial clients requiring durable and properly processed wood materials.

The SME seeks foreign partners for long-term cooperation to expand into new markets. Cooperation is expected mainly through: commercial agreements with distributors or agents representing the company's products abroad and/or supply agreements with construction companies, timber wholesalers, or industrial customers requiring regular deliveries.

Advantages and innovations

- Many years of experience in wood processing
- Proven track record of reliable and timely deliveries
- Ability to adapt production to specific partner requirements
- Location in central Poland ensures good logistics and transport accessibility
