General Information

Short summary

An Austrian company in the field of machining technology is looking for partnerships to expand its business. In addition to precision CNC manufacturing, it now offers a 1,300 m² hall as a warehouse or distribution location in the EU. The space can be flexibly designed – including warehouse management and logistics by the company. The company is looking for a partner to jointly develop a tailor-made business model.

Full description

An Austrian company specializing in machining technology impresses with its high precision in the development and manufacture of CNC turned and milled parts. As a full-service provider, it is continuously expanding its expertise, particularly in the areas of grinding and surface treatment. The company stands for “handshake quality” and cultivates partnerships with customers, suppliers, employees, and industry colleagues. Sustainability and the responsible use of resources are firmly anchored in the company's philosophy.

In order to expand its business, the innovative SME is making a 1,300 m² hall available. This can be flexibly adapted to the requirements of a future partner – whether as storage space, a distribution base within the EU, or a combination of both. On request, the company will also take over warehouse management and logistics for Europe-

wide distribution. The aim is to work with the partner to develop a viable business model that makes optimal and economically sensible use of the potential of both sides.

Advantages and innovations

The warehouse is located in the center of Europe, with good connections to infrastructure (ship, road, rail, and airspace).

Technical specification or expertise sought

Materials: all kind of materials, small and large series, worldwide
