General Information

Short summary

A Swedish company specializing in the design and sale of children's products, clothing and stroller accessories is seeking a manufacturing partner within the EU for the production of stroller handle covers. The company is looking for a supplier able to manufacture products based on existing samples and specifications using OEKO-TEX certified artificial leather. Cooperation is sought under a supplier agreement.

Full description

Established in 2007, the Swedish company designs and markets a broad range of children's products, including children's clothing and stroller accessories. Products are sold primarily through the company's webshop under its own brand and designs.

The company is currently sourcing stroller handle covers from Asia but wishes to relocate production to a supplier within the European Union. The main reasons are to ensure compliance with EU chemical and safety requirements, improve traceability of materials and simplify logistics and import procedures.

The sought product is a stroller handle cover manufactured from artificial leather and equipped with a zipper fastening. The company already has existing products and patterns that can be used as a basis for production. Several models are produced with different dimensions and colours, while the manufacturing method remains largely the same across the product range.

Typical annual volumes are approximately 100 units per model and colour variation. The company is therefore seeking a flexible manufacturer that can accommodate smaller production batches while maintaining consistent quality standards.

The material used should preferably hold a valid OEKO-TEX certification or equivalent documentation demonstrating compliance with relevant EU requirements for chemical safety and consumer products.

Advantages and innovations

Technical specification or expertise sought

The company is seeking manufacturers of sewn textile or artificial leather products located within the European Union.

The partner should:

- Have experience in manufacturing textile accessories or similar sewn products.
- Be able to produce stroller handle covers based on existing samples and specifications.
- Use OEKO-TEX certified artificial leather or equivalent compliant materials.
- Be capable of handling relatively small production volumes.
- Ensure high product quality and compliance with applicable EU regulations.

The expected cooperation type is a Supplier Agreement.
