General Information

Short summary

A Finnish company is specialising in the design and manufacturing of their own stone and steel jewelry collection. Due to growing demand they are looking for subcontractors mainly for the manufacture of stone jewelry (parts). Other jewelry manufacturers can also be considered, for example steel jewelry manufacturers.

Full description

A Finnish family business is known for their unique stone and steel jewelry collection. The company is specialised in crafting jewelry from Finnish black stone.

There is a growing demand for their unique design jewelry and therefore, they are now looking for manufacturers who could produce the products from their current collections. They are also open to any new ideas and methods and very flexible adapting to new possibilities brought up by the manufacturing partner.

There are few alternative ways of collaborating:

1. Outsourcing the crafting of the stone parts, the raw material delivered either from Finland or elsewhere depending on the material.
2. Outsourcing the manufacture of stone parts and possibly also the manufacture of steel parts.
3. Manufacture of jewelry products with a custom label.

The company is looking for different options on how to outsource the manufacturing their products efficiently and allow expanding their collections in the future.

Advantages and innovations

Technical specification or expertise sought

Jewelry manufacturing expertise and technical capabilities.

Stage of development

Already on the market

Sustainable Development goals
