General Information

Short summary

A Polish manufacturer of steel structures is looking for producers of noise barriers interested in the supply of steel poles for noise barrier construction. The company are looking for partners who want to find new supplier for steel poles for noise barriers construction. Company is looking for road construction companies, fitting companies, noise barriers producers, construction companies and construction designers.

Full description

Polish company, located in central Poland nearby Route E75/Highway A1, specializing in the production of welded steel structures. Established in 2007, the company initially focused on construction locksmith services. Over the years, it has expanded its operations to include a broader range of metalworking services, related to various industrial needs. The company has quality management system conformable with the requirements of the standard ISO 9001:2015.

In recent years, the company has specialized in the production of steel poles for noise barriers. It has extensive experience and the necessary tools to efficiently and effectively prepare poles for noise barrier construction projects. It strives to meet even the most stringent requirements. Its steel poles are already being delivered to Sweden, Norway, Denmark, Estonia, Latvia, and Lithuania.

For the production of steel poles, it uses materials from trusted steel suppliers, compliant with the EN 10204 – 3.1 standard. It works with all common steel grades, including S235, S275, and S355. Its welding processes comply with the EN 1090-2 standard (in EXC1, EXC2, and EXC3 classes). It provides corrosion protection for the poles through hot-dip galvanization (according to EN 1461) and painting.

The company is characterized by an individual approach to each project. It carries out production in accordance with the designer's guidelines, selecting the best solutions in terms of cost and quality. It makes every effort to complete production within the planned timeframe, maintaining constant communication with the client and providing regular updates on production progress.

In addition to the production of steel poles, the company also carries out:

- Metalworking Services: Comprehensive metalworking services, including welding and locksmith services.
- Steel Structures: Design and construction of steel structures, such as halls, frames, shelters and other related projects.
- Steel Poles: Production of steel post for fencing, noise barriers, supporting systems,
- Stairs and Railings: Manufacture of metal stairs, railings, and handrails.
- Gates: Production and installation of various types of gates, including industrial and entrance gates.
- Fencing: Manufacture and installation of metal fences, including panel fences.
- Machinery and Equipment: Production of metal products for the machinery industry.

The company carries out all the necessary processes in the preparation of steel structures. It welds components using MIG, MAG, TIG, and MMA methods. It cuts and processes steel using CNC laser cutting, plasma cutting, and oxygen cutting. Additionally, it uses a band saw for effective cutting. It shapes and rolls steel elements as needed.

To ensure corrosion protection, it applies hot-dip galvanization. Steel components are painted using either powder coating or wet painting methods. It also conducts non-destructive testing (VT, MT, UT) to verify quality and durability. All materials are supplied in accordance with customer specifications.

Advantages and innovations

The company has been carrying out projects for over a dozen years. Thanks to the experience of its design and production teams, it can tackle a wide range of challenges in steel structure manufacturing. It handles a diverse range of production orders—from small projects to large-scale orders weighing hundreds of tons of steel.

It takes a comprehensive approach to production, covering every stage—from steel preparation, through welding and corrosion protection, to final delivery. It collaborates internationally with many companies. Its clients include multinational industrial corporations, large national enterprises, as well as small local businesses.

The company is open to all projects and approaches every task with the same level of commitment and professionalism.

Technical specification or expertise sought

The company are looking for partners who want to find new supplier for steel poles for noise barriers construction. Steel post producer are looking for road construction companies, fitting companies, noise barriers producers, construction companies and construction designers.

The company are open for single projects and also for long-term cooperation, based on trusty and loyalty conditions.

The company's goal is to maintain confidentiality and fulfill commitments on time, ensuring mutual business growth. It aims to develop its presence in the industry, take on new projects, and expand base of satisfied customers.
