General Information

Short summary

A French SME specialised in plastic injection of small sanitaryware components is looking for an industrial partner for chromium plating solution under supplier agreement.

Full description

European leader in the sanitaryware and building sectors, the French SME is specialised in small plastic component for sanitaryware. The company has a strong sustainable development policy. It is committed to a policy of reducing its CO2 emissions,

In particular, it produces toilet flush buttons. These sanitary accessories are made of ABS Telluran GP22 and have a surface area of between 0.52 and 1.35 dm². The SME is currently looking for a manufacturer capable of providing chromium VI or Chromium III plating services for these accessories. Plating thickness range from 16.3 to 39.5 µm.

The parts come into contact with ceramic surfaces and are exposed to cleaning products. Therefore, the parts, particularly the chrome plating, must be durable.

In addition to chromium plating quality, cost will be a key selection criterion.

The company is interested in a supplier agreement.

Advantages and innovations

Technical specification or expertise sought

The plastic parts are made of ABS Telluran GP22 and have a surface area of between 0.52 and 1.35 dm². The supplier would be able to offer chrome VI or chrome III plating services for these accessories. Plating thicknesses range from 16.3 to 39.5 µm.

The partner should be able to ensure the quality of the final product. This should be in terms of both technical and aesthetic aspects.
