General Information

Short summary

A French SME specialising in plastic sanitaryware components is looking for an industrial partner to supply toilet flush buttons as part of an outsourcing agreement.

Full description

European leader in the sanitaryware and building sectors, this French SME is specialised in small plastic components for sanitaryware, particularly toilet flush buttons. The company has a strong sustainable development policy and is committed to reducing its CO₂ emissions.

It is now looking for an industrial partner that will be able to provide toilet flush buttons according to its requirements. Currently, these accessories are manufactured in ABS Telluran GP22 and undergo a chromium treatment to achieve a thickness of between 13.3 and 39.5 µm.

The parts come into contact with ceramic surfaces and are exposed to cleaning products. Therefore, the parts, particularly the chrome plating, must be durable.

In addition to the quality of the chrome plating, cost will be a key selection criterion.

The company is interested in entering into a supplier agreement.

Advantages and innovations

Technical specification or expertise sought

The partner should be able to ensure the quality of the final product. This should be in terms of both technical and aesthetic aspects. Therefore it must have expertise in injection moulding and chromium plating of small parts (surface area between 0.5 to 1.35 dm²).

Chromium plating should preferably be processed using chromium VI or chromium III.

A commitment to a policy of sustainable development would be appreciated
