General Information

Short summary

JDS is an innovative German IT company specializing in real-time transportation data solutions, maritime analytics, and maritime intelligence. The company provides custom data solutions for port operators, security agencies, logistics providers, and energy traders. JDS is seeking technology partners, data suppliers, and research collaborations to enhance its tracking, analytics, and predictive intelligence capabilities.

Full description

JDS focuses on collecting, analyzing, and processing transportation and mobility data, particularly for maritime, logistics, and security applications. The company provides customized vessel tracking, data-driven risk detection, port intelligence, and real-time multimodal data solutions to a range of private and industrial clients.

Core services include:

Real-Time Transportation Data Solutions (AIS tracking, vessel movement monitoring, maritime domain awareness).

Predictive Analytics & Risk Intelligence (ETA forecasting, dark vessel detection, spoofing & jamming alerts).

Port & Terminal Optimization (Congestion forecasting, berth allocation, supply chain visibility).

Custom Data Integration & API Services (Easy integration for logistics, defense, and security partners).

Sustainable & Intelligent Mobility Solutions (Optimizing transportation efficiency with environmental impact monitoring).

Advantages and innovations

JDS actively transfers research and innovation into marketable IT solutions, helping clients implement cutting-edge mobility data technologies into their operations.
