## General Information

### Short summary

The Ukrainian enterprise is specialized in manufacturing of building structures from recycled plastic and modular homes from these profiles. The production site is located in Lviv. The company is looking for business partners (investors, enterprises, distributors) for project development and product sales to customers.

### Full description

The leading Ukrainian manufacturer of construction structures and modular houses is looking for partners for the development of production, research and certification of technologies. For a good income, the company must have optimized and scalable production. There is a lot of raw material in Ukraine, so there will be no interruptions in supply. With the progress of the reconstruction of the east of the country, there is a great demand for durable structures. In the future, the construction of the plant in regions where there is a large number of termites. The company's designs are not afraid of pests and moisture.

#### Advantages and innovations

The company that develops building structures from waste. It produces profiles from which you can make houses and cover roofs.

It has been proven in the laboratory that the designs are quite suitable for the construction of buildings. Constructions will be useful in regions where fauna is aggressive to wood. Where the tree may be damaged by pests.

Constructions are not afraid of water, which makes them durable in conditions of dampness and high humidity.

The design of the houses is modern and thought out as much as possible for ease of living. Thanks to the traditional decoration, the constructions of recycled plastic are well hidden from the eyes and do not harm the residents of the house in any way.
