General Information

Short summary

A fast-growing Polish premium jewellery brand is looking for reliable manufacturers that offer an excellent price-to-quality ratio and have an in-house R&D/design department to co-create unique, exclusive jewellery collections under manufacturing agreement

Full description

The company is a fast-growing Polish premium jewellery brand (established 2024, micro-enterprise), managed by experienced executives with a strong business background. The brand's strategy is built on a strong, credible market identity, offering products that combine aesthetic value with uncompromising, top-tier execution quality. The company currently sells locally and through cross-border e-commerce marketplaces within the European Union, and is now seeking to scale internationally.

Products: necklaces, bracelets, rings, earrings, and jewellery accessories.

Cooperation sought:

The company is looking for modern, reliable manufacturing plants and jewellery producers. The goal is to negotiate terms that optimise production costs while maintaining a strong commercial margin, while strictly adhering to execution standards that eliminate complaint risk. A key element of this cooperation is ongoing collaboration with the supplier's in-house design department (R&D). The aim is to co-create innovative, unique designs to be manufactured exclusively for the brand.

Advantages and innovations

Technical specification or expertise sought

Highest, repeatable quality in the processing of precious metals and stones, precise detailing preventing technical defects, a technically advanced in-house design department (CAD/3D/R&D), readiness for flexible prototyping, and willingness to sign confidentiality/exclusivity agreements. Certificates confirming the purity and authenticity of precious metals used (compliance with assay/hallmarking standards) and an internal quality-control system (e.g. ISO 9001 or equivalent) are required.

Partner Sought

Expected role of the partner

The partner is expected to provide professional jewellery manufacturing services, including the production of luxury jewellery using modern machinery and design software. The partner will be responsible for implementing and refining the brand's unique designs, optimising production costs, ensuring high-quality standards and strict quality control, and delivering finished products in accordance with agreed specifications and deadlines. The partner should also be open to ongoing cooperation with the brand's design/R&D team to develop innovative, exclusive jewellery collections.
