General Information

Short summary

With a team of 300+ software engineers, 90% of projects coming via recommendations (4.9 Clutch rating), 5+ years average employee loyalty, and 95% client retention with 50+ long-term partners, we deliver excellence in Fintech. We specialize in innovative financial applications, mobile and web platforms, staffing expert developers, and consulting that accelerate digital transformation while ensuring compliance, security, and superior user experience.

Full description

We build innovative, secure, and scalable solutions that empower financial institutions and startups to lead in the Fintech market. With 18+ years of expertise, we develop custom applications that combine user-friendly design, robust data analytics, and strong security to meet modern financial challenges.

Our Fintech development services include:

- Custom financial software development: tailored Fintech platforms with seamless integration, scalability, advanced analytics, and AI capabilities that optimize operations and drive growth.
- Mobile application development: secure, intuitive apps designed for outstanding user experience across devices, ensuring compliance with financial regulations.
- Staff augmentation: access 50+ Fintech developers who seamlessly integrate into your team, adding value from

day one and accelerating delivery.

- Fintech consulting & digital transformation: strategic consulting to identify best-fit technologies and implement future-ready systems.
- Payment solutions: integration of third-party checkouts or development of custom systems with top security, speed, and user satisfaction.
- KYC/AML solutions: smart technologies that strengthen compliance, enhance decision-making, and reduce risks.
- Fundraising platforms: advanced solutions with financial, social, and management features for effective campaign promotion.
- API development & integration: secure, seamless system interconnectivity for improved user experience and operations.
- Financial data management: tailored tools ensuring real-time data accuracy, advanced reporting and regulatory compliance.

Our mission is to equip financial businesses with cutting-edge software and technical expertise that improve efficiency, security and innovation.

Advantages and innovations

3 reasons to hire us:

- 50+ Fintech developers onboard: whether you need niche expertise or a full-scale team, we deliver top engineers who match your project's skills and culture requirements.
- Technical excellence: with 18 years of Fintech expertise, we design, build, and support sophisticated solutions that add tangible business value.
- Flexible engagement: from a single developer to a complete team, we adapt swiftly to your business needs, ensuring agility and efficiency throughout our partnership.

Our Tech Expertise:

- AI tools: GPT, Prophet, H2O.ai, TensorFlow – enhancing efficiency, automation and security in financial services.
- Cloud & infrastructure: Azure, AWS, GCP, Kubernetes – ensuring scalable, reliable and secure financial platforms.
- Data analytics: PowerBI, Qlik Sense, Tableau, Apache Kafka – enabling data-driven insights, reporting and better decision-making.
- Security & compliance: OAuth, OpenID Connect, ISO/IEC 27001, PCI-DSS – prioritizing industry standards to safeguard sensitive financial data.

We combine innovation with proven expertise, offering secure, scalable, and intelligent financial software solutions that support digital transformation and long-term competitiveness in the Fintech sector.
