General Information

Short summary

A Bulgarian machine-building company specializes in designing and manufacturing innovative technological equipment, including automated lines for laminated tube production and tube filling automation. The company seeks partnerships to enhance manufacturing process automation across various industries.

Full description

Established in 1961, this company has evolved into a modern machine-building plant with a highly qualified staff capable of providing customized packaging solutions. The company specializes in the research, design, and manufacturing of unique technological equipment, focusing on automated lines for laminated tube production and tube filling automation.

Its product portfolio includes automated laminated tube production lines designed for the efficient production of laminated tubes, primarily used in the cosmetics industry. Additionally, the company offers automation solutions for tube filling processes, enhancing efficiency and precision in packaging operations.

The company aims to solve technological challenges related to the organization and production of laminated tubes, utilizing its highly skilled service and consultation teams. With decades of expertise, it continues to provide high-quality automation solutions tailored to the needs of various industries.

Advantages and innovations

The company provides customized automation solutions that are specifically tailored to meet individual client needs in packaging and manufacturing. Its innovative approach to research and development has resulted in unique technological equipment that significantly improves production efficiency. With over sixty years of experience, the company has established itself as a trusted leader in machine building, particularly in packaging automation.
