## General Information

### Short summary

The Lithuanian company executes infrastructure projects in the Baltic states and Scandinavian countries. The company is looking for partners to manufacture or supply standard cross-sectioned impregnated timber profiles according to the NTR quality standard. The supplier or manufacturing agreements are offered to potential partners.

### Full description

The Lithuanian company has executed infrastructure projects in the Baltic states and Scandinavian countries since 2015. The company specializes in projects, including: complex steel structures for bridges and other parts of infrastructure, noise reduction systems for roads and railways and other projects that require custom solutions, technical supervision and quality control, timely delivery and installation.

For the upcoming project, the company is looking for partners to manufacture or supply standard cross-sectioned impregnated timber profiles according to the NTR quality standard.

The supplier or manufacturing agreements are offered to the potential partners.

#### Advantages and innovations

- Experience in complex transnational infrastructure projects since 2015.
- Team of skilled specialists.
- End-to-End Solutions: The company offers a complete service from design to installation, simplifying project management.
- Versatility: The expertise in multiple materials allows this company to handle various infrastructure projects, from bridges and buildings to road or railway noise reduction projects.
- Efficiency: Integrated services can reduce costs and timelines, ensuring companies' projects are completed efficiently.
- Quality and Sustainability: Control over production ensures companies high quality and allows for sustainable material choice.
- Export turnover - 90 % currently.

#### Technical specification or expertise sought

- The company is looking for a supplier or manufacturer that produces standard cross-sectioned impregnated timber profiles according to the NTR quality standard.
- Required timber type – pine/spruce.
- Lengths of timber profiles vary from 3 meters to 6 meters and are chosen according to the project in question.
- Quantities for the upcoming project:
  - 45x95 L-3300mm – 165 pcs
  - 45x95 L-4200mm – 156 pcs
  - 45x45 L-3000mm – 245 pcs
  - 21x145 L-3300mm – 1470 pcs
- All markets are equally interesting, but to avoid high transport costs, the priority is given to partners from neighbouring countries (Poland, Latvia, Estonia, Sweden, Denmark, etc.).
