General Information

Short summary

A start-up based in Riga, Latvia, offers AI-Powered, Low Code, Business Automation platform that transforms how organisations handle routine operations. The platform offers a range of tools designed to streamline operations, enhance productivity, and accelerate decision-making without requiring technical expertise. The company is interested in forming commercial agreements to support partners in integrating and promoting their AI-powered tools.

Full description

The company is offering cutting-edge AI-driven automation platform designed to streamline business operations, enhance productivity, and enable digital transformation through intelligent process automation. The solution is aimed at businesses seeking to automate complex tasks without requiring deep expertise in AI or programming. The platform offers a range of tools designed to streamline operations, enhance productivity, and accelerate decision-making without requiring technical expertise.
The solution particularly excels in:
Customer Service Optimisation:
- Automates up to 80% of routine queries and support requests
- Provides 24/7 AI-Powered response capability
- Frees staff to focus on complex, high-value interactions
Intelligent Process Automation:

- Streamlines HR onboarding and IT support workflows
- Reduces manual task time through AI-Powered automation
- Enhances accuracy and eliminates process delays

Use Case Studies:
- Co-Pilot: An AI-powered assistant designed to automate complex tasks using conversational AI.
- Intelligent Process Automation: Tools for workflow automation, decision-making, and unstructured data processing.
- AI-Powered Recruitment Process: Automates shortlisting and workflow management to optimize hiring efficiency.
- AI-Powered Lead Scoring: Prioritizes high-potential leads using machine learning algorithms.
- Email-to-AI Automation: Manages email sorting, routing, and responses in real-time.

Advantages and innovations

- No Code/Low Code Approach: Accessible to users without technical expertise.
- Enhanced Efficiency: Businesses can boost productivity by automating workflows and decision-making processes.
- Cost Efficiency: Enables enterprises to build apps and automate processes at a fraction of the cost of traditional methods.
- Faster Integration: The platform allows seamless integration with existing business operations, ensuring rapid deployment.

Technical specification or expertise sought

The company is actively seeking Sales Channel Partners in Europe and North America to expand their market reach and provide their innovative solutions to a broader audience to achieve operational excellence whilst significantly reducing manual workload and associated costs. The company is interested in forming commercial agreements to support partners in integrating and promoting their AI-powered tools.
