General Information

Short summary

Spanish engineering company with extensive experience in the development of hardware and software for unattended payment environments (vending, mobility, gaming, laundry) is looking for commercial, outsourcing, supplier or investment partners to scale its smart payment and telemetry solutions internationally. The company offers Visa and Mastercard-certified payment modules, telemetry devices, and cloud-based platforms that improve operational efficiency and user experience.

Full description

The company, headquartered in Spain, has developed a comprehensive portfolio of smart devices and software platforms for the unattended payment industry. Its core products include:

- Telemetry modules for remote management of vending and self-service machines
- Contactless and QR payment terminals, compatible with EMV standards
- Cloud platform for real-time monitoring, transaction analytics, and machine status
- APIs and SDKs for system integration

With 200,000+ monthly transactions processed and partners in several sectors, the company is seeking to expand its

international footprint by identifying:

- Distributors for unattended payment terminals and telemetry hardware
- Integration partners for local adaptation or embedded deployments
- Clients in vending, mobility, parking, retail, or smart city services

Ideal partners would have experience in vending, payments, automation, or smart infrastructure

Advantages and innovations

The main advantages offered by the company and its solutions are:

- Registered hardware and software designed in Europe
- Visa and Mastercard certified for financial-grade security
- Modular approach enabling rapid adaptation to customer needs
- Proven success in the Spanish and Latin American markets
- Scalable technology already in use by large operators

Partner Sought

Expected role of the partner

The partner sought is expected to take a commercial role acting as a distributor, integrator, or agent to promote and expand smart payment and telemetry solutions. This includes representing and deploying certified Visa and Mastercard payment modules, telemetry devices, and cloud-based platforms designed to enhance operational efficiency and user experience in unattended environments such as vending, mobility, gaming and laundry. The ideal

partner would have experience in vending, payments, automation, or smart infrastructure and will have the capacity to scale these technologies locally and contribute to their international growth.
