General Information

Short summary

A spiral welded steel pipe manufacturer based in Adana, Turkey, with 50 employees. The company produces pipes ranging from d219 to d3000 mm in diameter and up to 45 mm in thickness. It is seeking long-term commercial partnerships.

Full description

The company is a reputable spiral welded steel pipe manufacturer established in Adana. It has a workforce of 50 professionals and specializes in producing pipes with diameters ranging from d219 mm to d3000 mm and up to 45 mm thickness. Equipped with advanced coating machines, the company offers a variety of coatings. The company has successfully expanded its market presence by exporting to countries such as Georgia, Bulgaria, Cyprus, and Egypt. Keeping up with technological advancements is central to the company's operations.

It is committed to continuously investing in its production facilities to use the latest industry technologies. As a result, continuous improvements are made in the production processes, ensuring that the quality of the final products continues to increase.

The company seeks to establish long-term commercial partnerships to expand its business network and develop

sustainable collaborations.

It aims to collaborate with a wide range of companies, including those awarded public tenders, providing high-quality products and reliable services tailored to their specific needs.

Advantages and innovations

Advantages:

High production capacity: Specialized pipe production in various diameters and thicknesses.

International success: Expanding market presence through exports to countries like Georgia, Bulgaria, Cyprus, and Egypt.

Advanced coating options: Utilizing various coating techniques to enhance pipe durability.

Innovation:

Technological investments: Constant investments in the latest industry technologies to improve production processes.

Continuous improvement: Ongoing enhancements in production processes, ensuring higher product quality.
