Since incorporated 20 years ago and we have accomplished many projects in oil and gas, petrochemicals, energy generation, water treatment industries. We provide software coding and testing services for automation systems, digitalisation and operation management system. We can provide remote engineering or onsite engineering services with strong team me

Full description

We are a Singapore based company offering specialised engineering services for automation system application development and programming services. We can provide control system design from documentation, programming, hardware and software engineering. Our engineers are trained in various brands of PLC and SCADA system, Honeywell DCS system. We provide customised coding services for specialised user interface, database system, integration of factory and manufacturing data with other commercial IT systems such as accounting and CRM systems, reporting and dashboards for easy operation management, digital twin and IOT system integration. We are dedicated company established in 2005 and have accomplished many automation system integration projects for various industries including oil and gas, petrochemicals, power generation, waste and water treatment.

Advantages and innovations

We are specialist company and able to provide tailor-made customisation services which normally very expensive if you engage control system manufacturers themselves due to high overhead cost. We are cost effective because we use special tools and AI to streamline the requirements and avoid repeated and time-consuming coding and engineering methods. We also have vast network of programmers who reside in low cost countries such as India, Indonesia, Myanmar and Vietnam
