## General Information

### Short summary

Established in 2011 in Taiwan, this company specializes in roll-to-roll optical coating and provides premium PET films for industries such as printing, automotive, electronics, and industrial computing. Their products are widely applied in touch screens, membrane switches, nameplates, and graphic displays. They are now looking for distributors in European markets to expand their presence and build long-term partnerships.

### Full description

Founded in 2011 in Taiwan, the company focuses on roll-to-roll optical coating and has developed a strong reputation as a manufacturer and supplier of high-quality PET films. With expertise in printing, automotive, electronics, and industrial computing industries, the company emphasizes eco-friendly processes and premium quality. All PET films are SGS- and RoHS-certified, ensuring compliance with international safety and environmental standards. They are free from harmful substances such as Cd, Pb, and halogens, reflecting a strong commitment to sustainable production.

The company's product portfolio includes:

1. Polyester Films
2. Textured Films
3. Anti Glare Films
4. Medical Films
5. PC Films
6. Anti UV Films
7. Brushed Films
8. Scratch Resistance Films
9. Hydrophilic Films
10. Hard coating Films

Products are available in roll or sheet formats, with customized options including antibacterial, anti-fog, and anti-UV coatings. The company has established export channels to Europe, Southeast Asia, and mainland China, with well-known domestic clients in the IT and electronics sectors.

They are seeking distribution partners in Europe who can provide market insights, manage client relationships, and respond promptly to customer inquiries. The goal is to develop long-term, mutually beneficial cooperation in distributing PET films to industrial and consumer markets across the region.

#### Advantages and innovations

The company stands out for its advanced customization capabilities and eco-friendly solutions. PET films can be tailored with antibacterial, anti-fog, and anti-UV coatings to meet diverse operational and environmental demands. Their solvent-free UV adhesives further demonstrate a commitment to green processing. All products are SGS-certified, RoHS-compliant, and designed with sustainability in mind, ensuring both high performance and environmental responsibility.
