General Information

Short summary

A specialized Bosnian company experienced in metal surface treatment and electroplating is looking for European companies requiring subcontracting or manufacturing cooperation for the surface treatment of metal components, particularly for the automotive and industrial sectors.

Full description

The company, established in 2006 in Bosnia and Herzegovina, specialises in metal surface treatment and electroplating services. It has extensive experience in providing surface treatment solutions for metal components used in the automotive and other industrial sectors.

Its expertise includes zinc plating, aluminium surface treatment, SurTec 650 treatment and nickel-tin coating.

The company is equipped to process components according to customers' technical requirements and specifications and aims to establish long-term cooperation with European manufacturing companies.

The company is interested in cooperation with partners seeking a reliable subcontractor for specialized metal surface treatment processes and finishing of metal components.

Advantages and innovations

Technical specification or expertise sought

The company is looking for European manufacturing companies requiring specialized metal surface treatment and electroplating services for metal components.

Potential partners should have a need for processes such as:

- Zinc plating
- Aluminium surface treatment
- SurTec 650 treatment
- Nickel-tin coating

The services are particularly relevant for components intended for automotive and industrial applications.

The cooperation may involve regular subcontracting of surface treatment processes according to the partner's technical specifications, quality requirements and production needs.

Partners are expected to provide technical specifications, drawings and/or other relevant requirements for the components to be treated.

Stage of development

Sustainable Development goals

- **Goal 9: Industry, Innovation and Infrastructure**
- **Goal 8: Decent Work and Economic Growth**
- **Goal 12: Responsible Consumption and Production**

IPR Status

IPR Notes

Partner Sought

Expected role of the partner

The partner should provide metal components requiring surface treatment together with relevant technical specifications, quality requirements and expected production volumes.

The partner would cooperate on:

- technical requirements
- production planning
- quality requirements

- delivery schedules
- quality control
- regular production orders

The company is open to establishing long-term cooperation with European companies requiring reliable and specialized metal surface treatment and electroplating services.
