General Information

Short summary

A Turkish company based in Konya, established in 2005, specializes in precision machining and manufactures hydraulic power chucks for CNC machines, drill chucks, live centers and screw jacks. The company offers subcontract machining services for serial production based on customers' technical drawings and seeks international distributors and manufacturing partners interested in subcontracting cooperation.

Full description

The company is a Turkish manufacturer established in 2005 and based in Konya, Türkiye. It specializes in precision machining and operates in the metalworking and machining sectors.

The company manufactures hydraulic power chucks for CNC machines, drill chucks, live centers and screw jacks. In addition to its own manufactured products, the company provides contract machining services for serial production based on technical drawings and specifications supplied by customers.

The company reports holding ISO 9001:2015 certification and trademark registration for its YPZ brand, including registration with the European Union Intellectual Property Office (EUIPO).

The company is seeking international cooperation in the following areas:

- Contract machining and subcontracting services for serial production.
- Sales and marketing of its manufactured products, including hydraulic power chucks for CNC machines, drill chucks, live centers and screw jacks.
- Dealership and distributorship agreements for its products.

The company's target markets include Europe (EU/EEA, United Kingdom, Switzerland, Central and Eastern Europe, Baltic countries, Balkans and Ukraine), the Middle East and North Africa (MENA), South America and Latin America (LATAM), other African markets and Central Asia.

The company has not yet started active international sales but has established B2B contacts with potential partners. It seeks straightforward cooperation in the sale and purchase of products and services and, where conditions allow, long-term business partnerships.

Advantages and innovations

The company offers contract machining services for components manufactured according to technical drawings provided by its business partners. It delivers machined components on time and in accordance with the required technical specifications.

In addition to its subcontracting services, the company directly supplies its own manufactured products, including hydraulic power chucks for CNC machines, drill chucks, screw jacks and live centers.

These products are in constant demand in the technical hardware and machine tool sectors.

The company's main advantages include its ability to provide machining services tailored to partners' technical requirements, meet agreed delivery schedules and directly supply its own manufactured products from Türkiye.

Technical specification or expertise sought

The company is seeking international manufacturing companies interested in subcontracting machining services for serial production, as well as dealers and distributors interested in the sale and marketing of its manufactured products.

For subcontracting cooperation, the company provides machining services based on technical drawings and specifications supplied by its business partners.

For commercial cooperation, the company seeks partners interested in the sale and distribution of hydraulic power chucks for CNC machines, drill chucks, live centers and screw jacks.

Potential partners may operate in manufacturing, service or trading activities. Previous international cooperation experience is preferred.

IPR Notes

Partner Sought

Expected role of the partner

The company is seeking international manufacturing companies requiring subcontract machining services for serial

production, as well as dealers and distributors interested in the sale and marketing of its manufactured products.

Manufacturing partners are expected to provide technical drawings and specifications for components to be manufactured through the company's contract machining services.

Dealers and distributors are expected to cooperate in the sale and marketing of the company's products, including hydraulic power chucks for CNC machines, drill chucks, live centers and screw jacks.

The company expects straightforward cooperation in the sale and purchase of products and services and, where conditions allow, the establishment of long-term business partnerships.
