General Information

Short summary

A Spanish company with extensive experience in the sale and supply of equipment for power generation and distribution plants is looking for new electric generators suppliers. The company specializes in solutions for control, security, monitoring, and maintenance systems, as well as switchgear used in transformer manufacturing. They are seeking to expand their offering with innovative products tailored to the energy sector.

Full description

A Spanish company is looking to expand its product portfolio. The company is particularly interested in incorporating new brands and innovative technologies related to private and auxiliary electricity generation into the Spanish market. These may include gasoline, gas, solar-powered, RF-based systems, or other emerging energy solutions.

Its main customers include leading electricity generators and distributors, and some of the most prominent industrial players across high-impact sectors such as transportation, food production, automotive, and chemicals. These clients are leaders in their industries, not also in the Spanish market, but also at an international level. Their type of clients use the latest technology and innovation to stay ahead of the competition.

Advantages and innovations

- Recognised clients
- Post Sales Service (Well-equipped laboratory and expertise for covering any product failure the company distributes).
- Wide number and range of clients

Technical specification or expertise sought
