General Information

Short summary

The offer comes from a manufacturer based in Central Europe specializing in high-efficiency nut processing equipment for walnuts, hazelnuts, and almonds. The organization has over 12 years of experience in the industry and provides advanced technologies for cleaning, sorting, calibrating, and crushing various types of nuts. The equipment is certified according to European quality and safety standards, ensuring reliability and high performance.

Full description

The proposed technology is a modern industrial solution for processing walnuts, hazelnuts, and almonds. The system ensures a high level of automation and precision in key processing stages, including shell removal, drying, size calibration, shell cracking, kernel separation, and sorting.

At the current stage of development, the equipment is fully ready for commercial use and has been successfully implemented in production facilities across Europe, Asia, and North America. The technology is based on unique engineering solutions, including high-precision mechanical and sorting systems. The equipment has undergone extensive field trials and operational testing, confirming its reliability, efficiency, and compliance with industry requirements.

The equipment is manufactured according to international ISO quality standards and complies with EU regulations

for industrial food processing equipment. Certified materials and components are used in production, ensuring durability and low energy consumption.

This offer is targeted at enterprises operating in the food processing, agriculture, and nut production industries. The equipment is designed to meet the needs of both small businesses and large industrial producers, helping to significantly increase productivity and reduce waste. Key benefits for users include high-quality processing with minimal nut damage, automated systems that reduce labor costs, and energy-efficient equipment that lowers operational expenses.

The organization is looking for partners among distributors, commercial agents, and manufacturing companies to expand its presence in international markets and develop cooperation in new regions.

Flexible cooperation terms are offered, including supply agreements, agency agreements, and manufacturing contracts.

Partnering with this organization will allow companies to access proven technologies that enhance efficiency, reduce production costs, and comply with global food industry standards.

Advantages and innovations

- Over 12 years of experience in nut processing technology development.
- High-quality cleaning with minimal kernel damage.
- Process automation reduces the need for human labor.
- Equipment customization for different nut varieties and production capacities.
- Certified European standard materials and components.
- Installation, commissioning, and after-sales service support.
- Export deliveries to over 25 countries worldwide.

Partner Sought

Expected role of the partner

We are looking for:

- Distributors and agents with experience in the agri-food sector.
- Manufacturing companies interested in implementing new nut processing technologies.

Expected partner roles:

- Promoting and selling equipment in local markets.
- Providing technical support to customers on-site (optional).
- Having an online store for greater market presence.
