## General Information

### Short summary

Turkish manufacturer specialized in cotton yarns, blended yarns, and polyester DTY, offering certified production in compliance with international standards, seeks international fabric manufacturers, wholesalers, and distributors for long-term supply agreements and integration into global textile production chains.

### Full description

The Turkish company operates several yarn production facilities with a total monthly capacity exceeding 5,000,000 kg. Its manufacturing infrastructure includes 24 conventional ring spinning lines, 4 open-end (OE) systems, 18 compact ring lines for both carded and combed yarns, and 4 texturing machines for polyester yarns.

The company is capable of producing a wide range of yarn types including:

- Carded ring yarns: Ne5 to Ne24, with a capacity of 50 tons/day
- Open-end (OE) yarns: Ne6 to Ne12, carded, with a capacity of 50 tons/day
- Combed compact yarns: Ne16 to Ne40, with a capacity of 23 tons/day
- Textured polyester yarns: 75 to 600 denier, capacity of 50 tons/day
- Core-spun yarns: Ne8 to Ne24
- Dual-core yarns: Ne6 to Ne20

The production facilities are divided across four enterprises, allowing the company to offer ring-spun, slub, core-spun, and compact yarns using combed or carded inputs. Each unit applies different configurations to meet sector-specific textile needs in weaving and knitting applications.

The company aims to establish long-term collaborations with international partners, including fabric manufacturers, wholesalers, and distributors. By offering high-volume, certified yarns suitable for various textile applications, the company seeks to integrate its products into global supply chains and support large-scale production needs.

#### Advantages and innovations

The company holds multiple internationally recognized certifications related to sustainable production, quality, and management systems:

- BCI (Better Cotton Initiative): Ensures compliance with more sustainable cotton production practices.
- GRS (Global Recycled Standard): Confirms the use of recycled materials and adherence to chain-of-custody, social, and environmental criteria.
- GOTS (Global Organic Textile Standard): Verifies the use of organic fibers and high environmental and social standards across the supply chain.
- OCS (Organic Content Standard): Provides third-party validation of organic content, both 100% and blended.
- RCS (Recycled Claim Standard): Validates the presence and proportion of recycled materials in the final product.
- ISO 14001: Environmental Management System
- ISO 45001: Occupational Health and Safety Management
- ISO 50001: Energy Management System
- ISO 9001: Quality Management System
- ISO 27001: Information Security Management System
- REGENAGRI: Participation in a regenerative agriculture program to support soil health and sustainable land use.

These certifications support the company's structured approach to sustainable production, traceability, safety, and quality control.

#### Technical specification or expertise sought

#### Stage of development

**Already on the market**

#### Sustainable Development goals

- **Goal 9: Industry, Innovation and Infrastructure**
- **Goal 13: Climate Action**
- **Goal 12: Responsible Consumption and Production**
- **Goal 8: Decent Work and Economic Growth**
- **Goal 6: Clean Water and Sanitation**

## IPR Status

**No IPR applied**

## IPR Notes

## Partner Sought

## Expected role of the partner

The partner is expected to be a fabric manufacturer, wholesaler, or distributor seeking high-volume, certified yarns for textile production. The collaboration may include long-term supply agreements or integration into existing production chains.

## Type of partnership

**Commercial agreement**

## Type and size of the partner

- **SME 50 - 249**
- **Big company**
