## General Information

### Short summary

The Lithuanian company specializes in metalwork components manufacturing, assembling and the following CNC (computer numerical control) metalworking services: laser cutting, milling, turning/cylindrical grinding, bending, welding, blasting, priming and coating, riveting, threading, grinding, etc. The company is looking for trade intermediaries to work under manufacturing agreement and/or subcontracting agreement.

### Full description

The company is based in Lithuania, it has 32 years of experience in metalworking industry as a developer and manufacturer of various components and machinery. The company specializes in the following metalworking services: CNC laser cutting; CNC milling; CNC turning/cylindrical grinding; CNC metal bending; TIG/MIG (tungsten inert gas/metal inert gas) welding; abrasive shot blasting; and blasting; glass blasting; priming and coating; riveting; metal threading; abrasion/grinding.

Metalworking can be performed on different sizes, thickness and kind of metals: stainless steel, black metals and their alloys, aluminum and other non-ferrous metals.

The company provides high standard metalworking services for various type of industries like: construction, food processing machinery, energy, transportation and other manufacturing industries where metalwork components are needed.

The company, along with metalwork manufacturing service, can provide assembling service for industries where machinery is needed to optimize production or for new products where metal components are needed and/or assembled along with integrated electrical and automotive solutions.

The company is seeking to expand abroad more and is looking for new business partners - other metal processing companies, equipment manufacturers, companies from various sectors that have a demand for metal processing services. Metal components distributors or other companies, that constantly requires mechanical/metal components might be potential partners as well. The manufacturer is offering to work under subcontracting agreement and/or manufacturing agreement.

### Advantages and innovations

- The company owns more than 4000 square meters of area for production and warehouse, which are equipped with the innovative machinery and technology. That allows the manufacturer to ensure high performance and reliability to provide required customized solutions for metalwork.
- The company provides innovative solutions; its products are manufactured according to the EU safety regulations.
- The manufacturer offers wide spectrum of metal variety choice.
- It can handle all kind of different sizes, shapes and quantities of metalworking products and offer various processes.
- The company can provide technical drawing service for the project of your mind along with managing the manufacturing process from beginning to the end.

## Partner Sought

### Expected role of the partner

The company is seeking to expand abroad more and hopes to find new long-term reliable business partners. It is interested in working with metal components distributors or other companies, that constantly requires mechanical/metal components or tools for equipment, machinery or production processes. The partner could possibly be from any kind of industry. The company is offering manufacturing agreement to them.

Other metal processing companies, that need help in the metal processing area might be partners as well. The Lithuanian company would like to offer its services under the subcontracting agreement to them.

### Type of partnership

**Commercial agreement**

### Type and size of the partner

- **SME <=10**
- **SME 11-49**
- **Big company**
- **SME 50 - 249**

## Dissemination

### Technology keywords

### Market keywords

- **08002006 - Numeric and computerised control of machine tools**
- **08001012 - Speciality metals (including processes for working with metals)**
- **08003001 - Machine tools, other metal working equipment (excl. numeric control)**
